Space Management for ServiceNow
Better planning through workspace visualization

Triad Technology Partners, a Preferred ServiceNow Services Partner and a leading provider of Cloud Solutions for Enterprise IT, has developed a *Space Management application* that extends the location tracking and visualization capabilities of the existing ServiceNow platform. Triad's solution provides the real time visual data needed to support faster on-boarding, more efficient work space grouping and cost saving space consolidation decision making.

Solution Screenshot

Benefits to ServiceNow Customers:

- Visualize employee locations
- Import floor plans in ESRI, Autocad and Visio
- Track employee moves
- Adapt to floor plan changes in real time
- Sort and group employee spaces by department
- Maintain employee locations and assets

Triad's Space Management Solution Provides:

- Floor plan images showing occupied and available spaces
- Mapping capability for better planning
- Reporting tools to pinpoint optimal employee moves
- Space planning tools
- Real time on-boarding and off-boarding
- Filter searches by department

Triad Puts the Service in ServiceNow

Triad helps clients effectively map their processes and build the enterprise-wide IT Service Management portfolio necessary to realize the true potential of cloud-based services management. With a focus on up-front processes and defining required design elements, Triad delivers the best possible migration path for customers to use in transforming IT service management to meet their evolving mission goals.
